- 1) Pictures can be in digital format or we can scan them. While we do our best to enhance the photos we're given, only so much can be done with a blurry or torn photo. Do not send photos that are small or cut into various shapes.
- 2) Please put your photos in age order and number the back in pencil. Make sure to use a pencil only as a pen or marker can come through the photo.
- 3) Try to choose photos that evoke emotion or cause laughter. Choose close-ups over long distance shots. Action shots are always good and add to the enjoyment of the montage. We can use photos in landscape or portrait style but since your TV is horizontal, landscape is a better choice.
- 4) Our montages are unique and require days of editing time. Please allow 3 weeks if possible, earlier is better.
- 5) We use 100 pictures for a montage (shown at party) and 35 for growing up photos (placed prior to service on DVD). Additional charges will apply for added photos.

If you have any questions or ideas, feel free to call. We appreciate your interest.
